

## B1. Two Core Screens

**1. The iPad Home Screen.** This contains everything you need to view and edit individuals (See the iPhone section of this document for details). Landscape orientation is ideal when using an attached keyboard and has the added option to view a large 6-generation Ancestral Wheel (tapping the 'Big Wheel' tab on the right of the screen).

As with the iPhone version, tapping the Group Overview button (bar chart image) opens the Group Overview screen

The Group Overview screen is also where you have options to publish the data in your group.

Forebears lets you drill-down into the Group with a variety of interesting analyses. The iPad version has twice as many charts and tables of information
